TITLE OF INVENTION: METHOD OF DRIVING PLASMA DISPLAY PANEL

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1440	\$300	\$0	\$1740	11/24/2008

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or Fax (571)-273-2885

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 379 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 379 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

Allowable Subject Matter

1. Claims 1 is allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-9 are allowed since certain key features of the claimed invention are not taught or fairly suggested by prior art. In claim 1, "A method of driving a plasma display panel, the plasma display panel including discharge cells, each of the discharge cells formed at an intersection of a scan electrode and a sustain electrode, and a data electrode, the method comprising: dividing one field period into a plurality of sub-fields, each sub-field having an initializing period, writing period, and sustaining period; in the initializing periods of the plurality of sub-fields, performing one of allcell initializing operation and selective initializing operation, wherein, the all-cell initializing operation causes initializing discharge by applying a slowly ascending voltage from voltage Vp below discharge starting voltage toward voltage Vr exceeding the discharge starting voltage to the scan electrodes of all discharge cells for displaying an image, and applying a slowly descending voltage from voltage Vg smaller than the voltage Vr to voltage Va to the scan electrodes and, the selective initializing operation selectively causes initializing discharge only in the discharge cells subjected to sustaining discharge in the preceding sub-field by applying a slowly descending voltage from voltage Vq to voltage Va to the scan electrodes; and during the initializing period of initializing all cells, holding the sustain electrodes at 0 (V) and holding the data electrodes at positive voltage Vx, and causing initializing discharge between the scan electrodes and the sustain electrodes when applying the slowly ascending voltage from voltage Vp below discharge starting voltage toward voltage Vr exceeding the discharge starting voltage to the scan electrodes, and holding the sustain electrodes at positive voltage Vh and holding the

Application/Control Number: 10/566,328

Page 3

Art Unit: 2629

data electrodes at 0 (V), and causing second initializing discharge between the scan electrodes, the sustain electrodes and the data electrodes when applying the slowly descending voltage from voltage Vg to voltage Va to the scan electrodes". The closest prior art Kim (7,109,951 B2) teach a method and apparatus for driving a plasma display panel includes a wall charge control period is arranged between the initialization period and the address period ... the initialization period is divided into a set-up interval and a set-down interval, a rising ramp, wave form rising at a first slope from a sustain voltage until a sum value of the sustain voltage and a set-up voltage; and a falling ramp wave-form falling at a second slop from the sustain voltage until a negative voltage, however, singularly or in combination with other prior art, fail to anticipate or render the claimed limitations, such as, "wherein, the all-cell initializing operation causes initializing discharge by applying a slowly ascending voltage from voltage Vp below discharge starting voltage toward voltage Vr exceeding the discharge starting voltage to the scan electrodes of all discharge cells for displaying an image, and applying a slowly descending voltage from voltage Vg smaller than the voltage Vr to voltage Va to the scan electrodes and, the selective initializing operation selectively causes initializing discharge only in the discharge cells subjected to sustaining discharge in the preceding sub-field by applying a slowly descending voltage from voltage Vq to voltage Va to the scan electrodes; and during the initializing period of initializing all cells, holding the sustain electrodes at 0 (V) and holding the data electrodes at positive voltage Vx, and causing initializing discharge between the scan electrodes and the sustain electrodes when applying the slowly ascending voltage from voltage Vp below discharge starting voltage toward voltage Vr exceeding the discharge starting voltage to the scan electrodes, and holding the sustain electrodes at positive voltage Vh and holding the data electrodes at 0 (V), and causing

Art Unit: 2629

second initializing discharge between the scan electrodes, the sustain electrodes and the data

electrodes when applying the slowly descending voltage from voltage Vg to voltage Va to the

scan electrodes".

2. Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Mansour M. Said whose telephone number is 571-272-7679. The

examiner can normally be reached on Monday through Thursday from 8:30-6:00 P.M. The

examiner can also be reached on alternate Friday from 8:30 a.m. to 5:00 p.m. EST. If attempts to

reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard A. Hjerpe

whose telephone number is 571-272-7681.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

571-273-8300 (for Technology Center 2600 only)

Hand-delivered responses should be brought to the Customer Service Window at the

Randolph Building, 401, Dulany Street, Alexandria, VA 22314.
